# Building a digital native healthcare ecosystem

A modern, scalable cloud- digital native platform for healthcare institutions to improve efficiencies and enrich the quality of care and patient experience.

Turn your healthcare institution into a smart one. Prepare your hospital for the future. Over the past few years, many everyday experiences have turned digital. Healthcare is moving in the same direction. Digitization and new technologies are shaping the healthcare industry and accelerating the pace of innovation. The future of healthcare institutions will not be just brick and mortar. Instead, care will be provided in an environment where digital plays a central role in improving patient outcomes, providing enhanced patient and staff experience, while simultaneously optimizing operations.

Improve patient experience

Patients can access care from remote using the telemedicine system. They can also access test results on a real-time basis. The user-friendly Patient Note+ app allows patients to seamlessly communicate with doctors and hospital staff. Alerts to patients to save time on visiting clinics and hospitals. The homecare services can help patients to get the services at their doorstep. Patients may visit nearby clinics which are connected by Super specialty hospitals to avail best services.

Improve medical staff experience

Doctors can focus on consultation (in-person or remote) using Dr.Note+ app and they get quick access to patient records and vitals. The nurses can use Nursing Note+ App to record nursing activities and connect doctors online in case of emergency.

Improve care delivery and streamline the hospital operations

The system is designed to help healthcare institutions improve care delivery and generate value across the organization. The system helps healthcare providers to be prepared for the digital future. The system comes with various modules to streamline and automate the various functions of the hospital like Registration, Outpatient, Inpatient, Pharmacy, Lab, Radiology, PACS, Finance, Inventory and related services.

Improve management decisions effectively

Management staff gets various dashboards and alerts to take decisions and Management can plan and chart the top line growth more effectively. A highly integrated system provides instant reports for decision-making.

Value-added services

As you grow the value added services can be integrated seamlessly with third party clinical and ancillary solutions to support the continuum of care and generate value across the organization.

Key Features

Hospital Management

- Dynamic website
- Registration
- Appointment booking
- Outpatient consultation
- Billing
- Telemedicine
- Vital/Allergy recordings
- Drug Inventory
- Pharmacy
- Primary Dashboard & MIS
- Patient Portal
- Procurement
- Integrated Inventory
- Financial Accounting
- Patient App
- Lab & Radiology
- HRMS-Leave
- Payroll
- Daycare
- Emergency
- Billing and Insurance
- Inpatient Admission, Transfer, Discharge
- Ward Management
- Nursing Management
- Doctor Monitoring for in-patients
- Pharmacy-Inpatient, Retail
- Lab and Radiology for IP
- Multiple Dashboards & MIS -(10)
- Fixed assets
- Dr Note+ MobileApp
- Patient+ Mobile App
- Nursing + Mobile App

Clinical Management

- Dynamic website
- Registration
- Appointment booking
- Outpatient consultation
- Billing
- Telemedicine
- Vital/Allergy recordings
- Drug Inventory
- Pharmacy
- Primary Dashboard & MIS
- Patient Portal
- Procurement
- Integrated Inventory
- Financial Accounting
- Patient App
- Lab & Radiology
- HRMS-Leave
- Payroll
- Daycare

Hub & Spoke Model (Chains of clinics with Telemedicine)

- Multi branch Dynamic website
- Registration
- Appointment booking
- Outpatient consultation
- Billing
- Telemedicine
- Vital/Allergy recordings
- Primary Dashboard & MIS
- Patient Portal
- Lab & Radiology
- Drug Inventory
- Pharmacy
- Dr Note+ MobileApp
- Patient+ Mobile App

Add-ons

- Dietary
- CSSD
- Asset management
- Ambulance Management
- Blood Bank
- Biomedical equipment maintenance (AMC)
- Med Library
- Homecare
- Operation Theater & ICU
- Incident reporting & Helpdesk
- Feedback System

Value Added Services

- Lab equipment integration
- PACS (Picture Archival & Communication System) & integration
- Biometric system & integration
- Nursing School Module
- Training & evaluations Module
- Vital equipments integration
- Asset Tracking Management System

Cooperative Specific Modules

- Co-operative Financial Accounting
- Shareholders
- Fixed Deposits

Salient Features/Services

- Cloud Based
- Report writer
- Dynamic web sites
- Chatbot
- Payment gateway. SMS, email integration
- GST features included
- Dr Note + mobile App for telemedicine
- Patient + mobile App
- Screen displays - Doctors on leave and Queue systems
- Registration Card printing Request/permissions/approvals workflow
- Training and handholding to users inclusive
- Master data uploads
- Free Patch updates during AMC Filestore & Physical Location Sessions features to handle large files/Images of EMR
- Prescriptions through Whatsapp /patient portal/ Patient +app / or hospital
- Feature to upload and download reports by Patients
- Aadhar Integration (optional)
- Statutory Requirements
- Cloud based - Support

About Us

ULTS is the IT initiative by ULCCS Ltd was established in 2011, Specialized in disruptive technology including Blockchain, IoT, AI & Analytics, GIS, ERP, IMS and Cyber Security Solutions.

UL Technology Solutions (P) Ltd

4th Floor, UL CyberPark, Nellikode P.O, Kozhikode - 673016. Kerala, India.
